

A paradigm shift in knowledge organization systems/structures/services (KOS)
– Potentials and new functions of KOS in the Semantic Web environment

知識組織系統（KOS）的 跨典範模式研发

——探討在語義網中KOS潛力與功能的突破

Marcia Lei Zeng 曾蕾

Kent State University

“語意網視野下的知識組織與文化資產”研討會
中央研究院 數位文化中心, 歷史語言研究所

2016.06.02

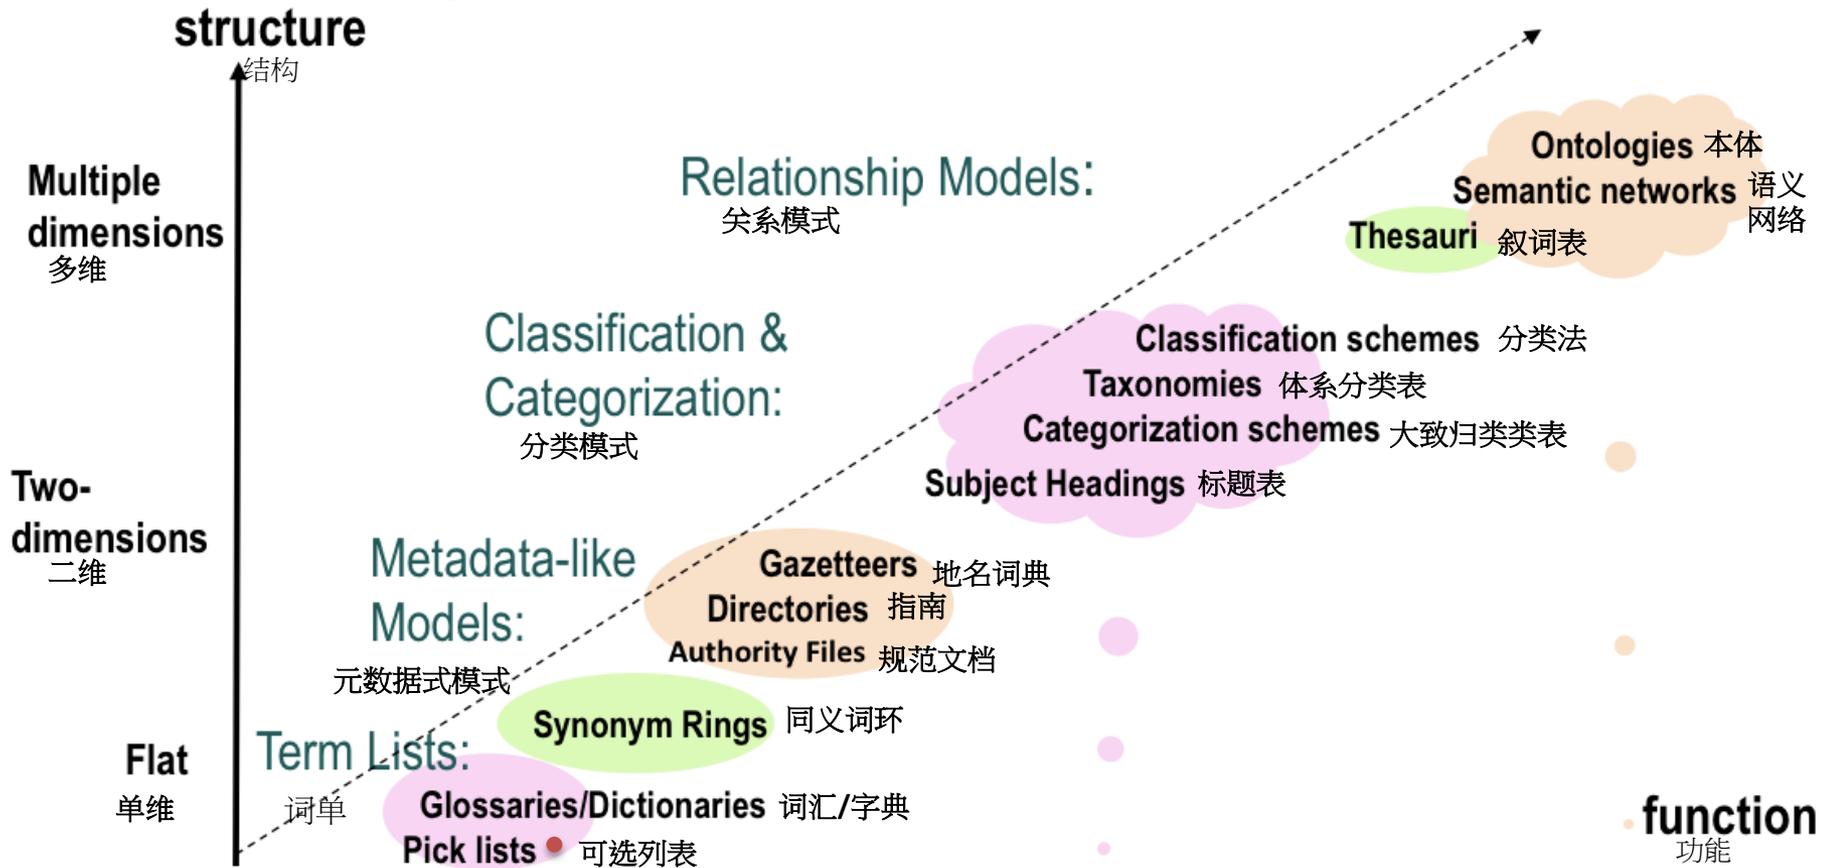

大纲

- 第一部分：追溯人類文明發展的歷史長河中對知識的劃分和組織方法
- 第二部分：分析檢索引擎採用KOS對信息進行檢索查尋和瀏覽的五代變遷
- 第三部分：細看KOS在语义网中的历程——以Getty词汇为特例

关于“知识组织系统”

- “知识组织系统” (Knowledge Organization Systems/Structures/Services) ——缩写为“KOS”。
 - 起源：“网络化的知识组织系统（NKOS）”第一次工作会议（NKOS Workshop）1997在美国召开, 开始采用KOS一词
 - 自1998年以来在美国和欧洲有NKOS workshops
 - 2015年第一次亚洲NKOS Workshop 在亚洲数字图书馆会议ICADL上举行
 - 历年会议资料见：<http://nkos.slis.kent.edu/>
- “KOS”成为各类检索语言或知识组织结构的统称，且被广泛采用。
- W3C的《SKOS简单知识组织系统》（SKOS Simple Knowledge Organization System）标准采用了KOS这一概念和术语
[SKOS是将各类KOS发布成关联数据的标准用语，2009.08.18正式成为W3C推荐标准。]

知识组织系统类型一览

Major functions	eliminating ambiguity 词义消歧	XXX		XXX	XX	XXXX	XX
	controlling synonyms 同义词控制		XXXX	XXX	XX	XXXX	XX
	establishing relationships: hierarchical 建立等级关系			X	XXXX	XXX	XXX
	establishing relationships: associative 建立 [等级以外的] 相关关系					XXXX	XXXXX
	presenting properties 揭示属性特征						XXXXX

第一部分 追溯

人類文明發展的歷史長河中 對知識的劃分和組織方法

1. 从波菲利之树 到林奈氏的科学分类体系

Porphyrian tree

波菲利之树

Porphyry (234-ca. 305 CE)
古罗马哲学家

波菲利之树是古罗马哲学家波菲利 Porphyry (234-ca. 305 CE) 在其著作 *Isagoge* 《亚里士多德〈范畴篇〉导论》中提出的一种对知识的分类体系。

将知识从“属”分支，一直分类到个体。

- genus (genos),
- species (eidos),
- difference (diaphoro),
- property (idion), and
- accident (sumbebekos).

引进了等级构架。

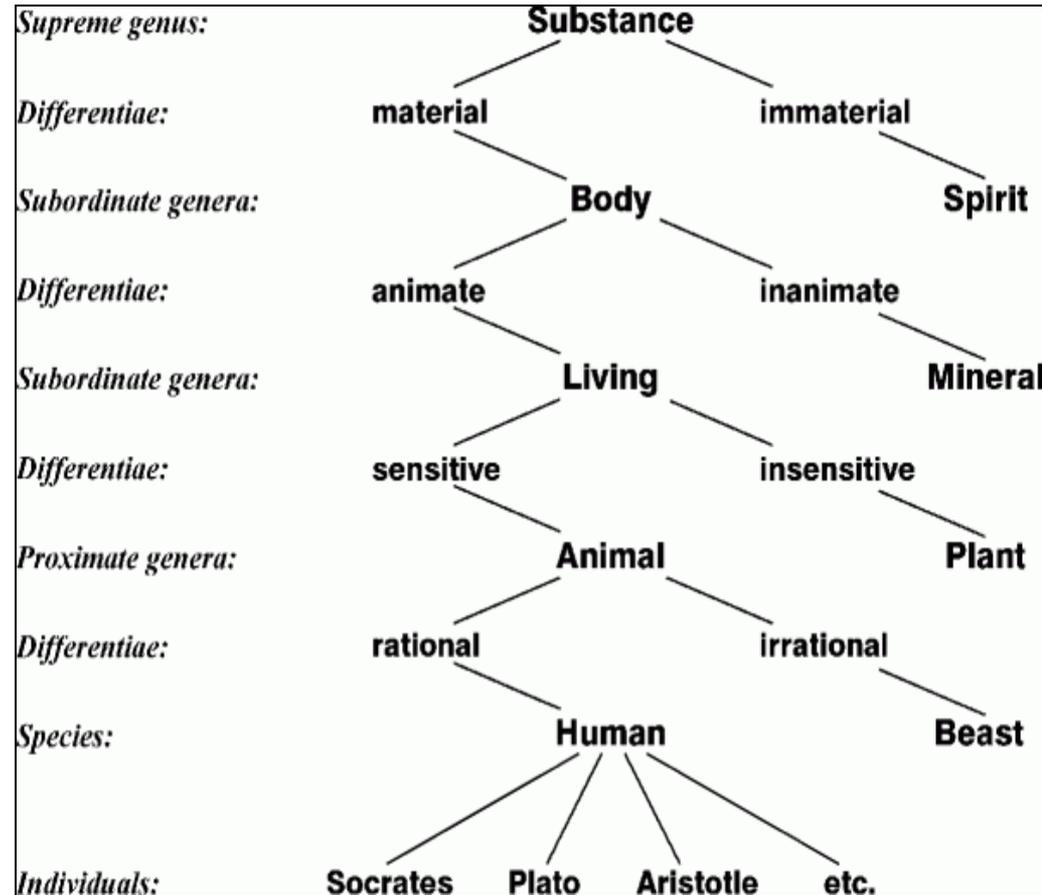

Image: A Porphyrian tree, originally draw by the 13th century logician Peter of Spain.

http://www.tertullian.org/fathers/porphyry_isagogue_01_in_tro.htm

https://en.wikipedia.org/wiki/Porphyrian_tree

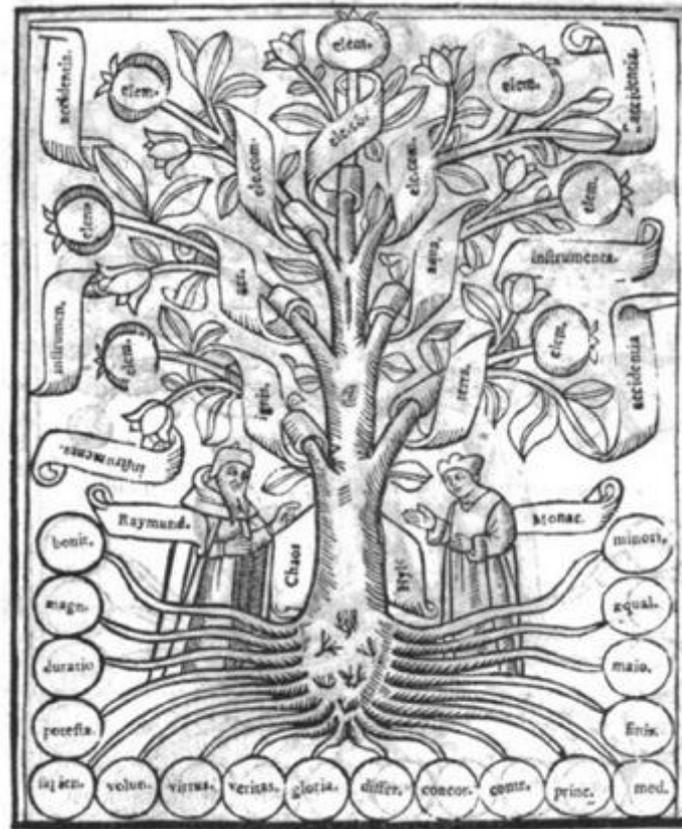

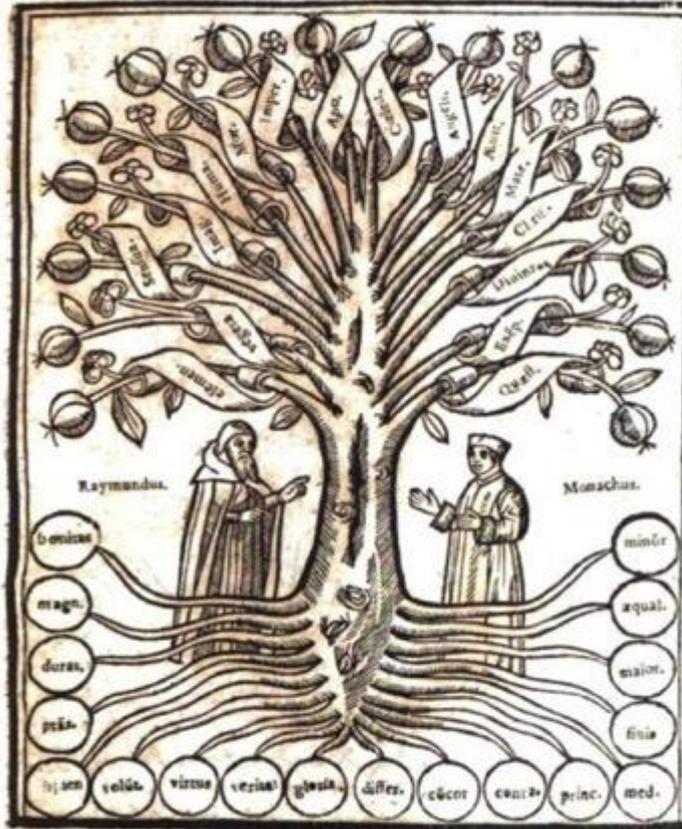

拉蒙·柳利

Ramon Llull (Catalan, 1232–1315)

加泰罗尼亚作家、逻辑学家

柳利的《科学树》

1295年到1296年之间，拉蒙·柳利发表了《*Arbor scientiae*》(Tree of science)

<http://www.historyofinformation.com/expand.php?id=3862>

“科学树”包括18个根，其中涉及到9个超然的原则和9项art原则。

Image source: a version published in Lyon, 1635, available through Google Books.

拉蒙·柳利

Ramon Llull (Catalan, 1232–1315)

加泰罗尼亚作家、逻辑学家

这部百科全书性质和开拓性的知识表达作品:

- 以“科学树”的模型展示了十六枝科学领域的科学树
- 其中每个科学通过与根，树干，树枝，树叶和果来展开
- 根代表每个科学的基本原则
- 这种植物寓言反应了亚里士多德的影响

柳利的《科学树》

林奈氏分類系統 Linnaean taxonomy

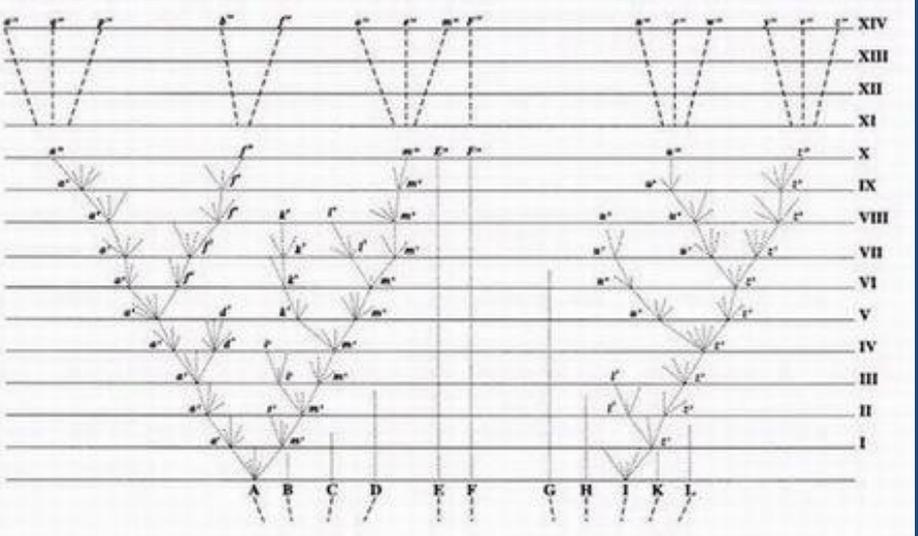

[林奈1735年發表
《植物種誌》
(Species Plantarum) 1st.ed.]

Generelle Morphologie der Organismen (1866)

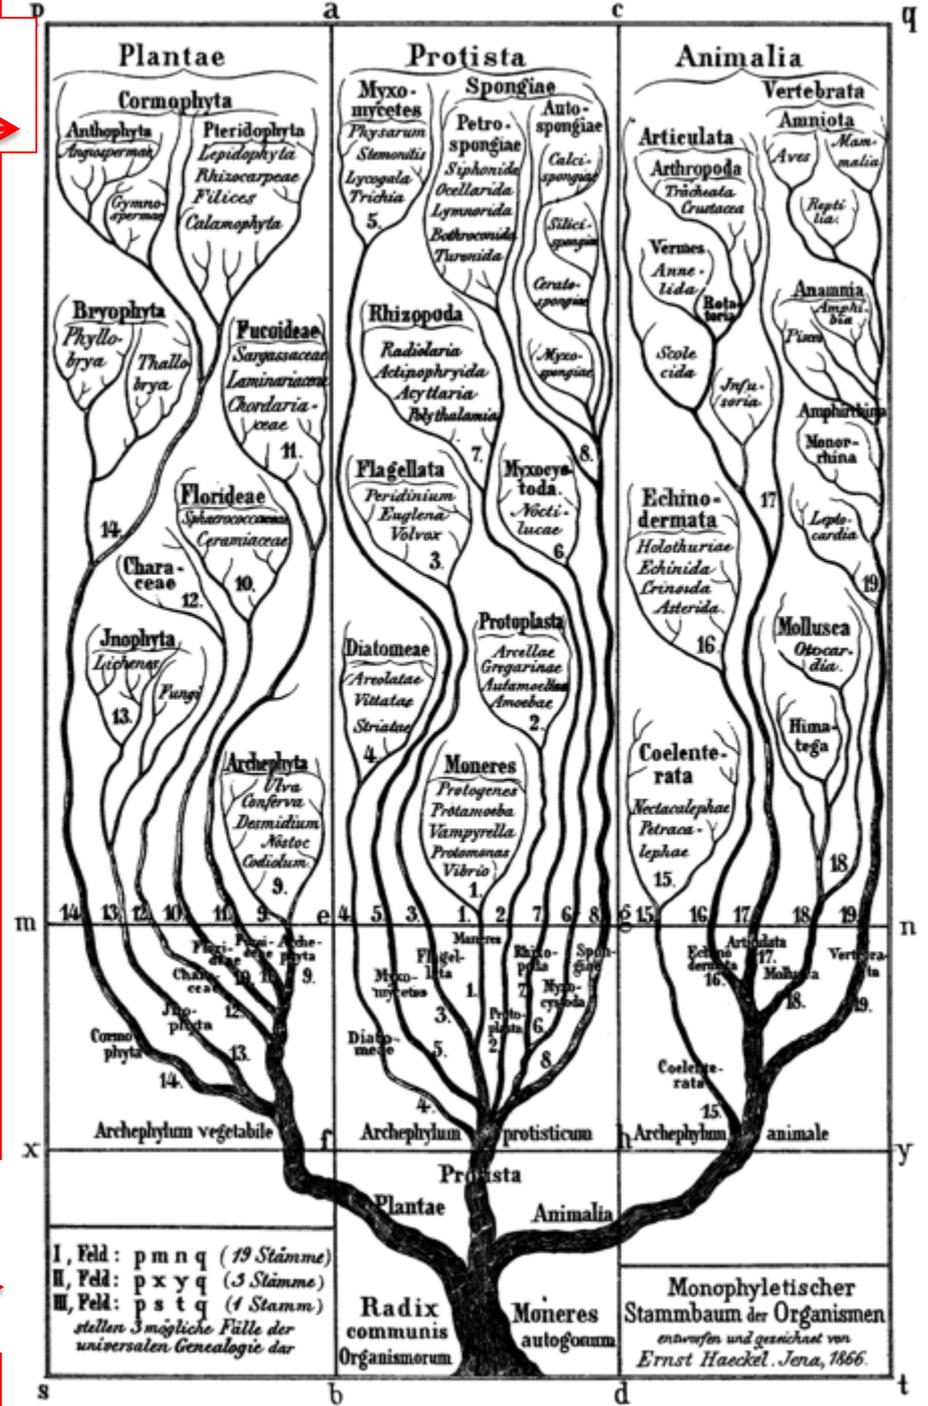

達爾文笔记 1837

達爾文《物種起源》插图, 1859

https://en.wikipedia.org/wiki/Tree_of_life_%28biology%29

恩斯特·海克尔 Ernst Haeckel (1834 – 1919) 将达尔文的进化论引入德国并在此基础上继续完善了人类的进化论理论。

I, Feld: p m n q (19 Stämme)
 II, Feld: p x y q (3 Stämme)
 III, Feld: p s t q (4 Stämme)
 stellen 3 mögliche Fälle der universalen Genealogie dar

Radix communis Organismorum

Moneres autogenum

Monophyletischer Stammbaum der Organismen entworfen und gezeichnet von Ernst Haeckel. Jena, 1866.

生物分类学的思想沿用至今，不断完善。

Synthesis power

“What distinguishes the universe of current knowledge is that it is a dynamical continuum. It is ever growing; new branches may stem from any of its infinity of points at any time; they are unknowable at present. They cannot therefore be **enumerated** here and now; nor can they be anticipated, their filiations can be determined only after they appear” (Ranganathan, 1951).

1960s: 计算机化的批量处理 (batch-processing systems)

- 美国宇航局 NASA's *STAR (Scientific and Technical Aerospace Reports)* 《科技航空航天报告》
- MEDLARS (since 1879, the National Library of Medicine had published *Index Medicus* manually. 1963 computerized)
- ERIC (Education Resources Information Center)
- *Science Citation Index* 《科学引文索引》

1970s—在线互动检索系统 (online interactive retrieval systems)

- NASA, RECON, DIALOG, MEDLINE, LEXIS, BRS 等
- 通过**DIALOG**提供的数据库数量:
 - 1972年: 3
 - 1984年: 200⁺
 - 1995年: 450⁺

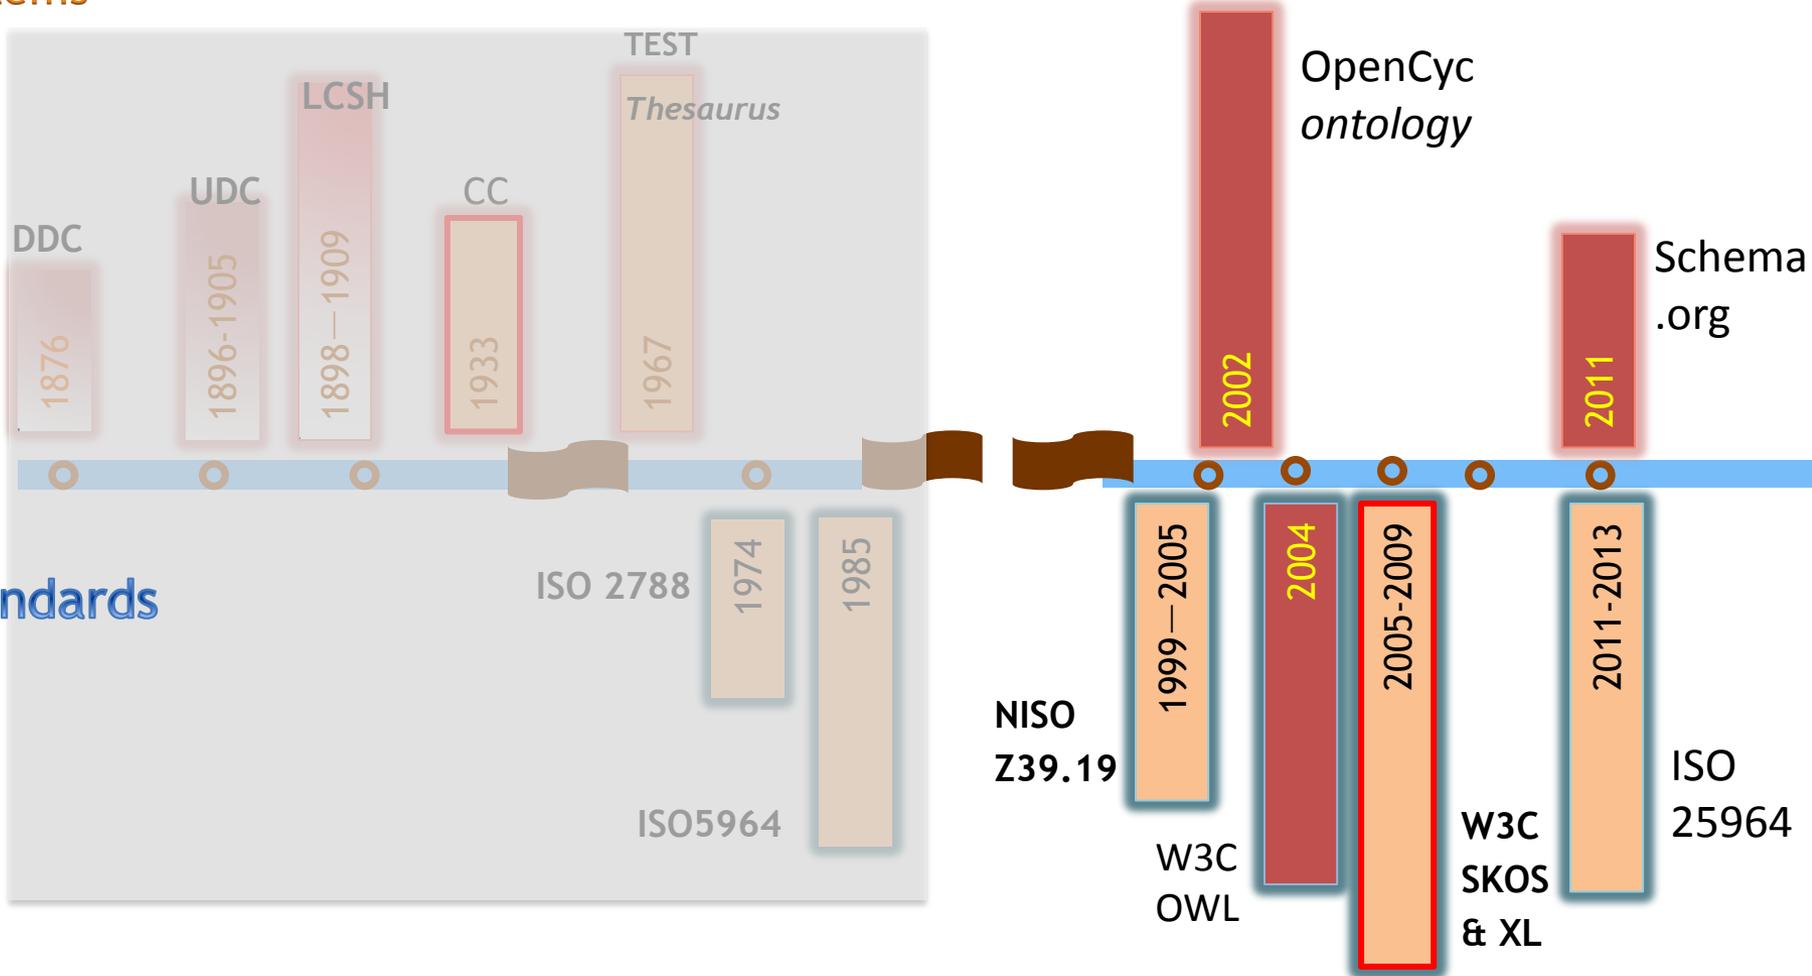

受控词汇controlled vocabularies的重要性: 提高信息检索效率

- 1967 Cranfield 克兰菲尔德测试
- 1969 Lancaster, 1981 Sparck Jones MEDLARS 调查
- 至1988美国和欧洲的在线数据库中使用150多个thesauri 叙词表和其它种类的受控词汇—根据Chan and Pollard汇编的名单

影响较大的现代KOS&国际标准 (c-1)

(示意图, 非精确)

Systems

NISO Z39.19 (2005) *Guidelines for the Construction, Format, and Management of Monolingual Controlled Vocabularies*

ISO 25964 (2011 pt1; 2013 pt2) *Thesauri and interoperability with other vocabularies*

《ANSI/NISO Z39.19》标准 从“叙词表”（1993） 扩大到“受控语言”（2005）

- 20世纪末
 - 万维网逐渐扩大
 - 社会对整个信息工作的需求产生巨大变化
 - 网络服务所需的各类知识组织结构的兼容及其用电子词表和其他新媒体发布等需求剧增
- 美国信息标准组织NISO
 - 1999.11. 4—5召集美国标引与检索及词表类表方面的研究和实践者举行了两天“电子叙词表工作会议”
 - 讨论修订国家标准《ANSI/NISO Z39.19—1993单语种叙词表建造、格式、与管理指南》的问题。
- 原标准自1974年以来一直限叙词表 thesauri范围
- 会议经过突破性的讨论和决定，接下来好几年的工作小组的努力，终于迈出这个框架，重新起草，跨越各种受控语言，2005年正式通过并发布了新的国家标准。
- 改名为《ANSI/NISO Z39.19—2005单语种受控语言建造、格式、与管理指南》 *Guidelines for the Construction, Format, and Management of Monolingual Controlled Vocabularies*

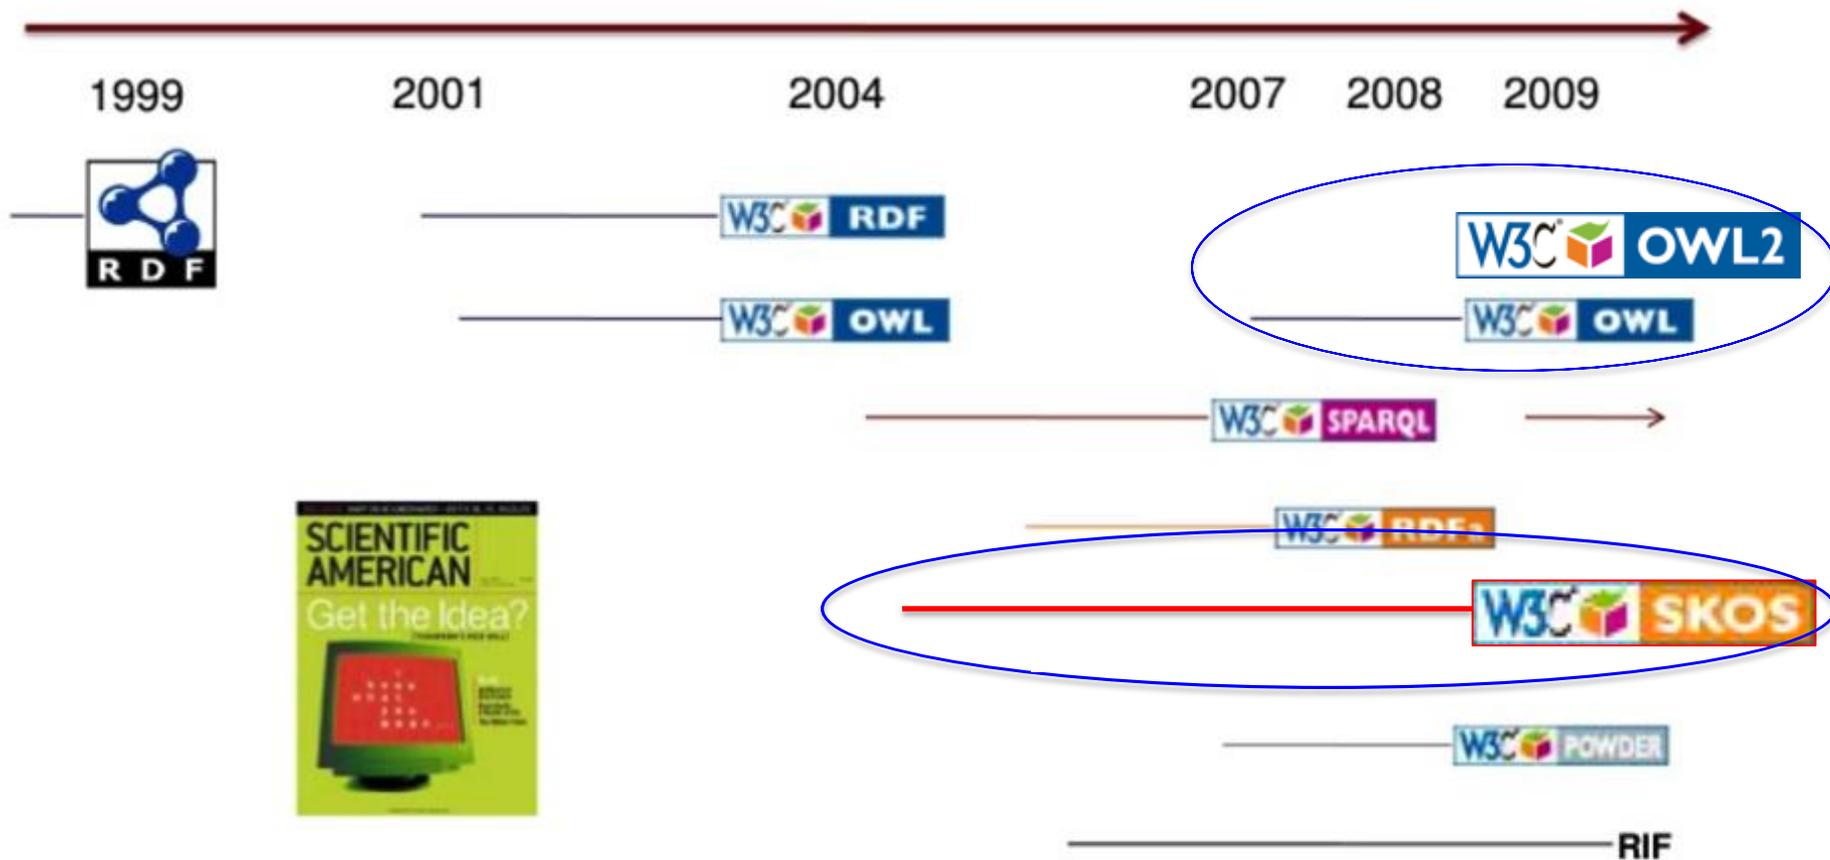

21世纪KOS新标准

- 美国国标NISO Z39.19-2005 (2005)
- 英国国标BS 8723 (2005-2008, 分五个部分)
- 国际标准组织《ISO 25964—叙词表以及与其他词汇的兼容性》(2011-2013, 分两大部分)
 - 强调是‘concept’而不是‘term’
- W3C推荐标准《SKOS简单知识组织系统》(SKOS=Simple Knowledge Organization System, 2005—2009由核心到完善并扩充至SKOS—XL)
- ISO 25964 SKOS extension (iso-thes) ontology (2014)

这些21世纪新型标准的特点都是在内容上以叙词表为基础展开，容纳各种语言的结构，特别是纳入分类结构和自然语言为基础的结构。

For more details: Clarke, Stella G. Dextre, and Marcia Lei Zeng. 2012. From ISO 2788 to ISO 25964: the evolution of thesaurus standards towards interoperability and data modeling. *Information Standards Quarterly*, 2012 Winter 24(1):20-26.

OpenCyc 开当代“本体”之先河

“Cyc”名字的来源是“encyclopedia”，发音：syke

Cyc = 致力于将各个领域的本体及常识知识综合地集成在一起，并在此基础上实现 知识推理 的人工智能项目。

目标=使人工智能的应用能够以类似人类推理的方式工作。

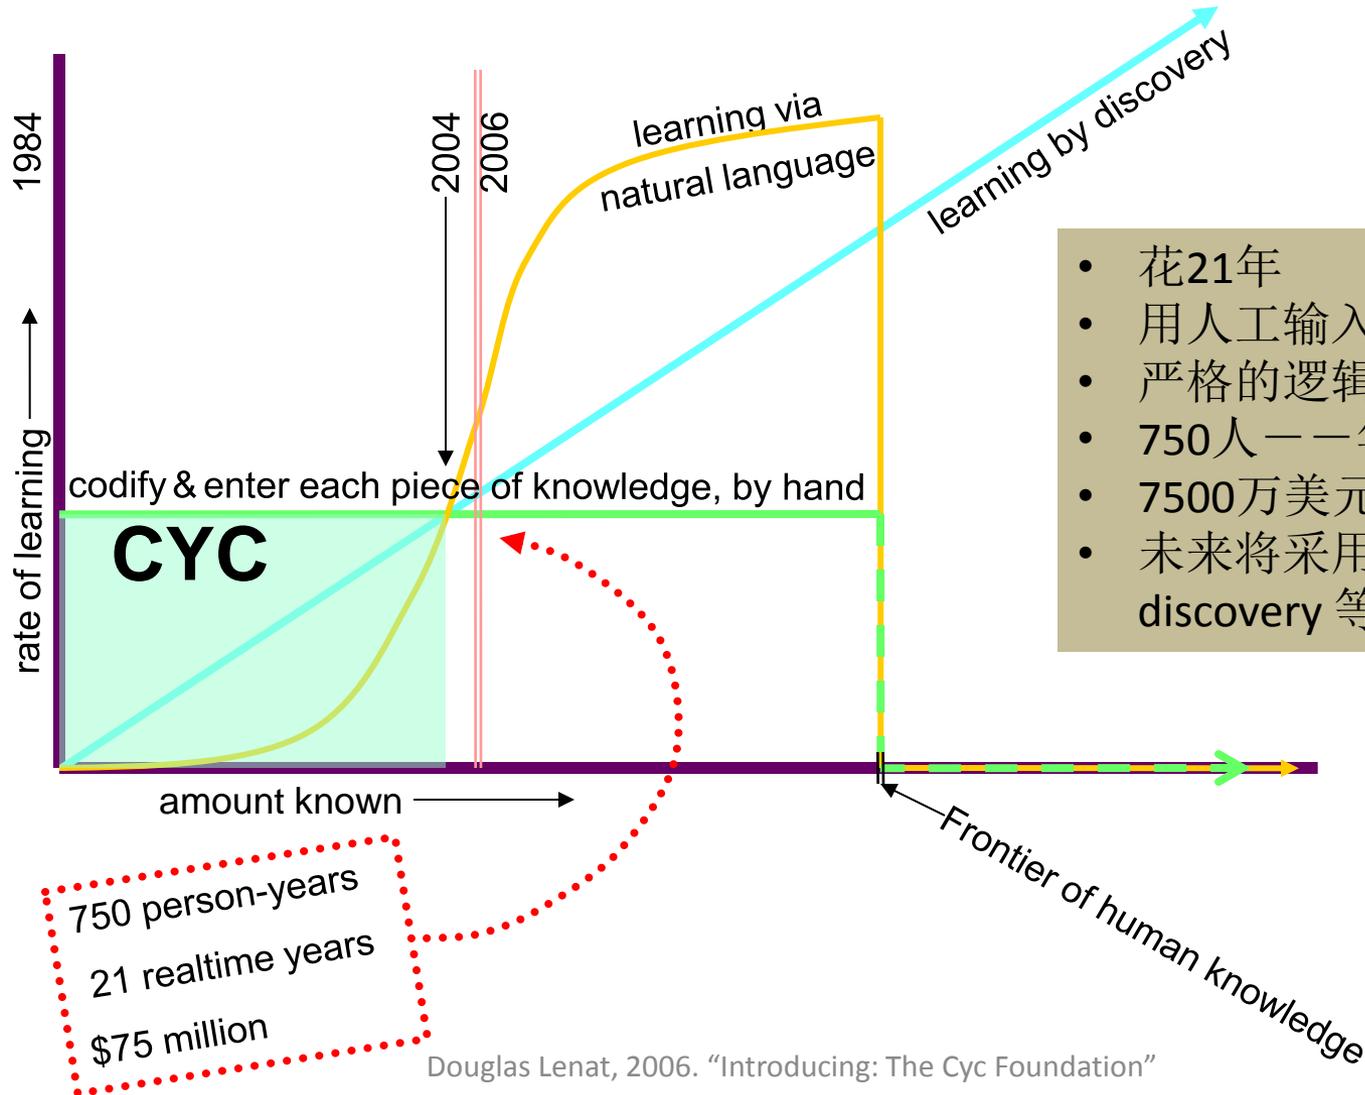

<http://www.cyc.com/>

- 1984，由当时的微电子与计算机技术公司开始开发，由Douglas Lenat设立
- 1986，Douglas Lenat预测如果想要完成Cyc这样庞大的常识知识系统，将涉及25万条规则，并将要花费350个人年才能完成
- 1994，Cyc项目从该公司独立出去，并以此为基础成立了Cycorp公司。
- 2002，OpenCyc的第一个版本发布（仅包含6000个概念、60000条事实）

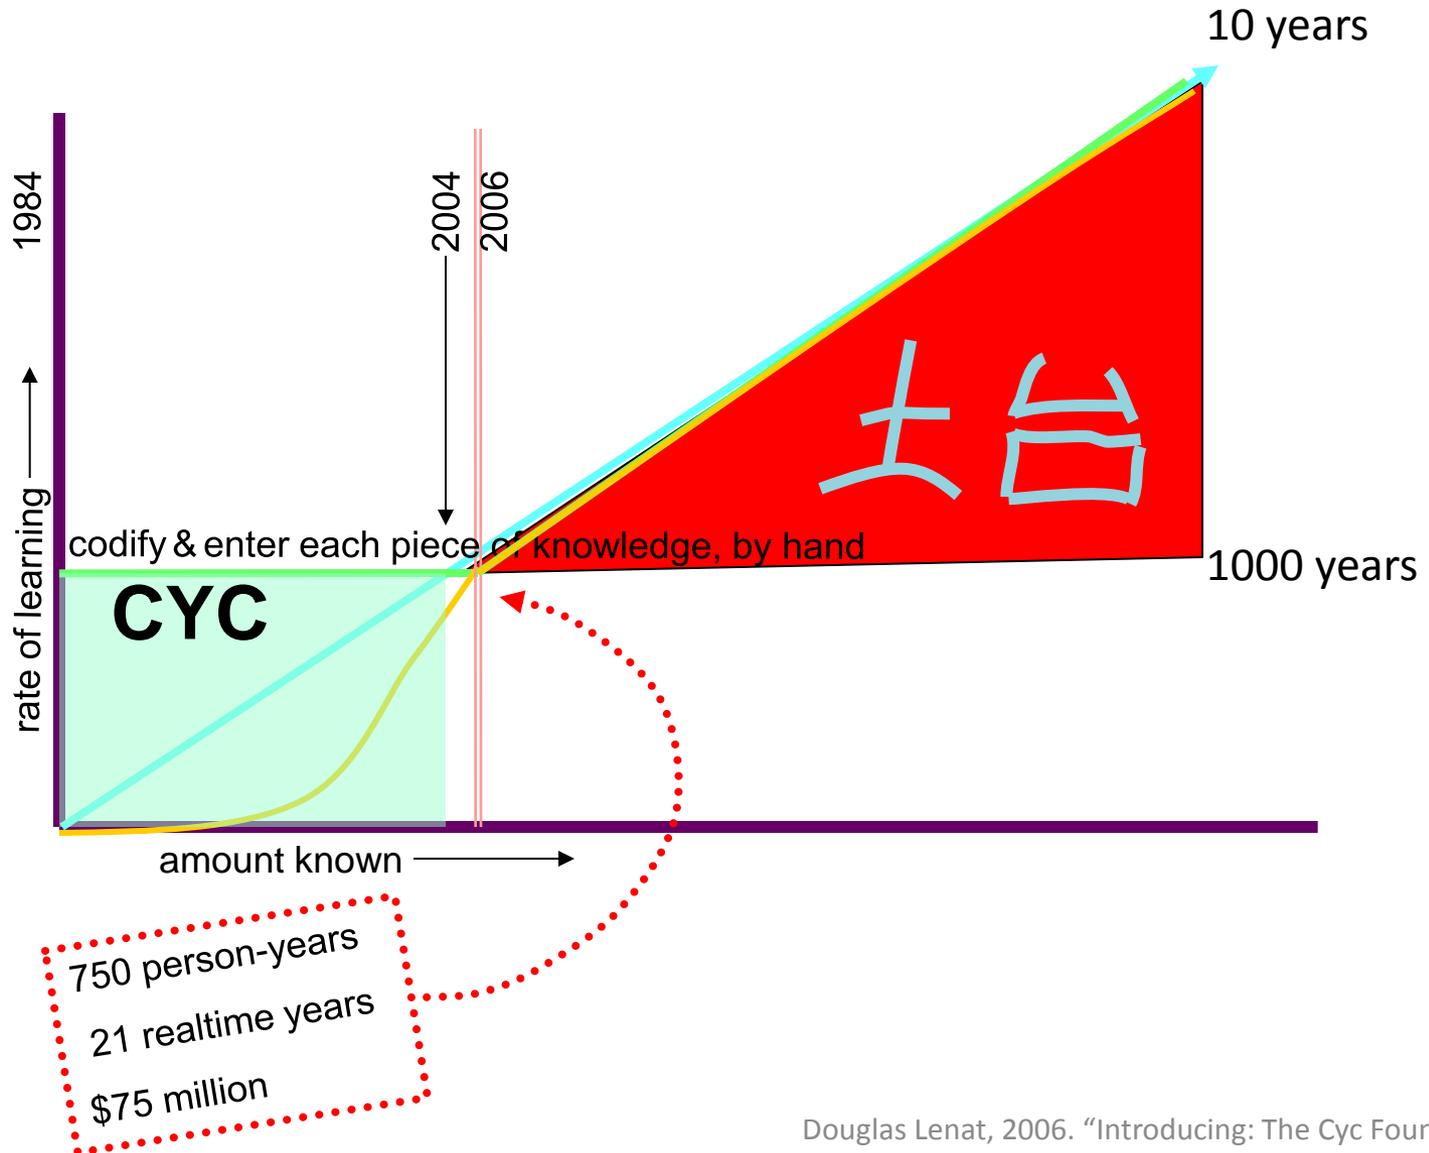

Building Cyc *qua* Engineering Task

- 花21年
- 用人工输入
- 严格的逻辑学培训
- 750人——一年的工作量
- 7500万美元
- 未来将采用NL, discovery 等学习方式

Douglas Lenat, 2006. "Introducing: The Cyc Foundation"

Building Cyc *qua* Engineering Task

不过，世上还没有 [普遍认为也不可能] 大家都接受的本体，所以导致无数个本体的产生。

例：BBC编制了一套本体词汇，用于管理BBC丰富的数位资产

- [BBC Ontology](#)
The BBC ontology is used to describe BBC concepts in linked data and interfacing with the triplestore, the platform publish or are relevant to the BBC's content.
- [Business News Ontology](#)
The Business News Ontology describes the concepts
- [CMS Ontology](#)
An ontology to represent the content management system should an entity in the triplestore, e.g., the URI for Manchester information about Manchester United, e.g., sports statistics CMS it was created. The CMS ontology provides the information about a thing in other systems.
- [Core Concepts Ontology](#)
The generic BBC ontology for people, places, events, the BBC. This model is meant to be generic enough, and or politicians using rdfs:subClassOf the particular concepts
- [Creative Work Ontology](#)
This is the model we use to express the minimum metadata. The creative work ontology is continuously evolving based which is the CreativeWork class and properties that such as title, thumbnail, URL e.t.c.
- [Curriculum Ontology](#)
This ontology aims to provide data model and vocabulary

- [Food Ontology](#)
A simple vocabulary for describing recipes, ingredients
- [Journalism Ontology](#)
An ontology which holds classes and properties which
- [Politics Ontology](#)
An ontology which describes a model for politics, sports spec, originally designed to cope with UK (England and
- [Programmes Ontology](#)
BBC Programmes aims to ensure that every programme findable web presence. We have developed the Programme approach, enabling the interchange of programme information
- [Provenance Ontology](#)
The provenance ontology supports data management graphs we used in the store (quad store) and enable expose data to our services
- [Sport Ontology](#)
The Sport Ontology is a simple lightweight ontology
- [Storyline Ontology](#)
An ontology to represent News Storylines.
- [Wildlife Ontology](#)
A simple vocabulary for describing biological species names and ranking of taxa, as well as providing supplementary characteristics, etc.

本体软件 [Protégé 5.0.0](#)
2016.05.25 正式版发布,
Protégé 注册用户已超过
三十万。

按内容来分，ontology 本体可以分三大类：

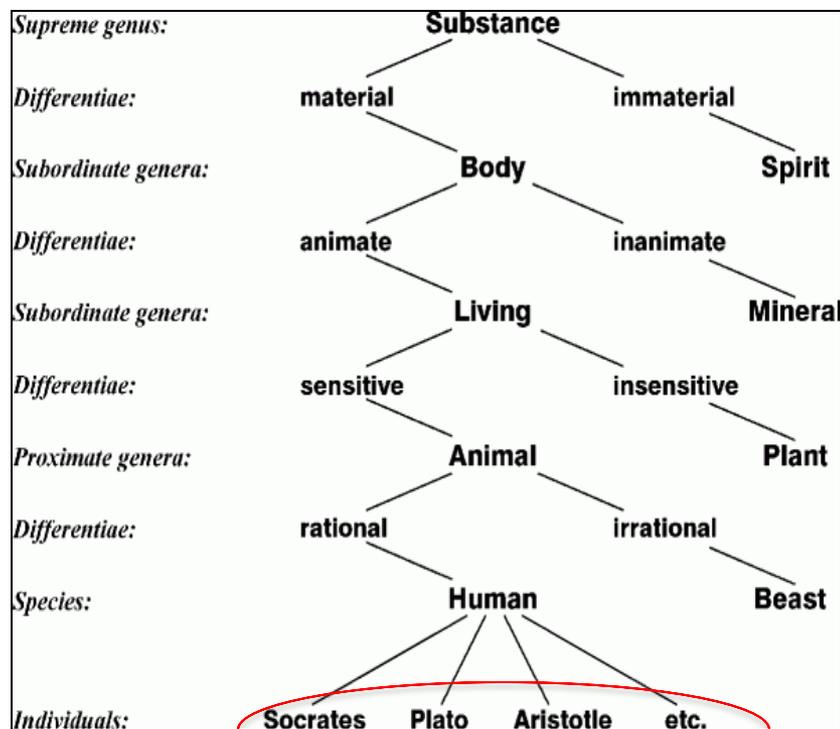

例：LOD Cloud
里用到的本体

1. 本体词汇(classes & properties), 作为知识架构, 通用 (e.g., **event**, **bibo**)
2. 本体词汇, 主要供表述分散形式的 (distributed) 具体个例使用 (e.g., **foaf**, **schema.org**)
3. 本体词汇并加上具体个例(instances)形成独立的知识库 (e.g., **OpenCyc**, **UMBEL**, **GeoNames**, **Dbpedia**)

A New Constellation in the Linking Open Data (LOD) Sky .
<http://www.mkbergman.com/457/a-new-constellation-in-the-linking-open-data-lod-sky/>

还记得波菲力树吗？

将知识从“属”分支，一直分类到个体。

- genus (genos),
- species (eidos),
- difference (diaphoro),
- property (idion), and
- accident (sumbebekos).

1. 本体词汇(classes & properties), 作为知识架构, 通用 (*e.g.*, event, bibo)
2. 本体词汇, 主要供表述分散形式的 (distributed) 具体个例使用 (*e.g.*, foaf, schema.org)
3. 本体词汇并加上具体个例(instances)形成独立的知识库 (*e.g.*, [OpenCyc](#), [UMBEL](#), [GeoNames](#), [Dbpedia](#))

例: Online Coins of the Roman Empire (OCRE)

第3类: 本体词汇(classes & properties) 加上具体个例 (instances), 形成独立的知识库

Feedback

Length-frequency compositions and weight-length relations for bigeye tuna, yellowfin tuna, and albacore (Perciformes: Scombrinae) in the Atlantic, Indian, and eastern Pacific oceans

lod:live

Zhou, Y.

Zhu, G.

Dai, X., Tuna Fishery Technical Working Group of China, Shanghai, China

Xu, L., Shanghai Ocean University, Shanghai (China). College of Marine Sciences

Abstract:

Bigeye tuna, *Thunnus obesus* (Lowe, 1839), yellowfin tuna, *Thunnus albacares* (Bonnaterre, 1788), and albacore, *Thunnus alalunga* (Bonnaterre, 1788), are very important species for world fisheries. The weight-length relations (WLRs) of the three species were studied using commonly accepted methodology. Significant differences can be found from the fork length distributions and the WLRs of the above 3 tuna species and the relations of gilled-gutted and whole weight of bigeye and yellowfin tunas collected from the Atlantic, Indian, and Eastern Pacific Oceans. Significant differences of fork length distributions can be found for bigeye tuna, yellowfin tuna, and albacore from the three areas. The data collected will be useful for the fisheries management of the three species studied

} limit 5
  
```

use structured query to search data

Enter a SPARQL select or describe query in the text widget to the left, then press the Do Query button. All known namespace abbreviations will be in effect. Or first select the Prolog radio button and enter a Prolog query (perhaps with additional lisp forms as well). Basic Emacs keystrokes can be used to edit the text.

In the results table, left-click a column header cell to sort the table by that column. Left-click a node cell to visit that

OCLC WorldCat Works
197 Million Nuggets of Linked Data 2014-
直接采用Schema.org

WorldCat Linked Data

The bibliographic metadata found in WorldCat contains a rich set of objects that can be represented in linked data. Extracting entities like works, persons, and places from that metadata will create a foundation of WorldCat linked data, which will support the introduction of Web services that offer a range of functionality and access to the data.

The Schema.org ontology, extended by other ontologies as needed, is being used as a basis for modeling WorldCat bibliographic data. This provides fullest coverage, improved functionality, and better consumption of this data for our harvest partners and library members looking to do more with structured data exposed within HTML pages (via [RDFa 1.1](#)). More detailed information about the [vocabulary](#) used by WorldCat.org linked data is available.

第二部分

分析檢索引擎

採用KOS對信息進行 檢索查尋和瀏覽的 五代變遷

The collage illustrates the evolution of search engines and the use of Knowledge Organization Systems (KOS). It features several key elements:

- Search Engine Interfaces:** Screenshots of Yahoo! (with various category links like 'Arts and Humanities', 'Business and Economy', etc.), Altavista, and Google search pages.
- KOS Schema Diagram:** A diagram showing a 'Thing' class with properties like 'additionalType', 'alternateName', 'description', 'image', 'name', 'sameAs', and 'url'. It also lists actions such as 'AchieveAction', 'LoseAction', 'TieAction', 'WinAction', 'AssessAction', 'ChooseAction', 'VoteAction', 'IgnoreAction', and 'ReactAction'.
- Google Search Result:** A screenshot of a Google search for 'krakow', showing results like 'krakow', 'crakows', 'krakow deli', and 'krakow deli parma' with approximately 74,400,000 results in 0.40 seconds. A note at the bottom says 'Showing results for *krakow* Search instead for Crakow'.
- Other Elements:** A 'schema.org' logo, a 'bing' logo, and a 'Crakow' logo.

第一代 提供简单查寻服务

1996 AltaVista

The screenshot shows the AltaVista homepage with the following elements:

- Logo: **ALTA VISTA Technology** with the tagline "View Multimedia From Our Vantage Point".
- Advertisement: "Car Buying & Car Insurance Pain Relief" with a "LOW COST" speech bubble and icons of cars.
- Text: "Click here for advertising information - reach millions every month!".
- Search Form: "Search the Web and Display the Results in Standard Form" with a "Submit" button.
- Text: "Search with Digital's Alta Vista [Advanced Search] [Add URL]".
- Buttons: "Contests Make Me Laugh..." and "Creative Web Create a Site...".
- Text: "Download free demo versions of AltaVista Technology software".
- Footer: "ALTA VISTA" logo and "[Creative][Search][Humor][Email]" links.

1997-12 NorthernLight

The screenshot shows the NorthernLight search engine homepage with the following elements:

- Search Bar: "Search" button above a "SEARCH FOR:" input field with a "Search" button.
- Select: Radio buttons for "All Sources -- Search the World Wide Web & Sp...", "World Wide Web -- Search the entire World Wi...", and "Special Collection -- 1 million articles not on ot...".
- Section Header: "Discover The Difference Searching With Northern Light".
- List-Group: Three arrows pointing to:
 - [Custom Search Folders™](#) - Results are organized into folders to narrow your search.
 - [Fast, Accurate Results](#) - Hits that match your search requirements quickly.
 - [Special Collection](#) - information from over 1,800 journal databases and newswires not available on any other search engine.
- Special Collection Feature: "Special Collection FEATURE OF THE WEEK" box with text "All articles from U.S. Pharmacy week" and a link to "week".
- Text: "Find out about Northern Light's [Accolades](#) and...".
- Copyright: "Copyright © 1997, Northern Light Technology LLC. All rights reserved." (partially visible).

第三代

分面、多方位、高效的检索

- 1) 采用分面方法 faceted approach
 - PMEST（主体、物质、动力、空间，时间）及扩充
- 2) 提供多种查寻入口和通道，而非单一框架和路径
- 3) 将KOS 嵌入系统后端，用分类法 taxonomy 等帮助检索**后续分类 / 过滤**(filter)和浏览。
- 4) 自动分析、扩检、总结。 更好的ranking和检索效率

Northern Light Power Search, 2001

The screenshot shows a web browser window with the following elements:

- Browser Address Bar:** Displays "Search" and "Power".
- Navigation Buttons:** "Publication Search", "Industry Search", "Current News", and "WEFA Reports".
- Search Section:**
 - SEARCH FOR:** Includes input fields for "Words anywhere:", "Words in title:", "Publication name:", and "Words in URL:". A "HELP" button is next to the "Words anywhere:" field.
 - Select:** Radio buttons for "Special Collection", "World Wide Web", and "All Sources" (selected).
 - SELECT DATE RANGE:** Includes a checkbox, a text box for "Fill in one date field or both to narrow your results by date.", and fields for "Start date:" and "End date:" with a "mm/dd/yy" format. A checkbox for "Sort results by date" is also present.
 - SELECT SOURCES:** Includes a checkbox and "All Sources below" with a list of source categories: "Journals & Magazines", "News archives", "Personal pages", "Commercial web sites", "Non-profit web sites", "Educational web sites", "Military web sites", and "Government web sites".
 - Documents written in:** A dropdown menu set to "Any language".
 - Web sites from:** A dropdown menu set to "All countries".
 - SELECT SUBJECTS:** Includes a checkbox and "All Subjects" with a grid of subject categories: "Arts", "Business & Investing", "Computing & Internet", "Contemporary life", "Education", "Entertainment", "Gov't, Law & Politics", "Health & Medicine", "Humanities", "Products & Services", "Reference", "Science & Mathematics", "Social sciences", "Sports & Recreation", "Technology", and "Travel".
 - LIMIT DOCUMENTS TO:** Includes checkboxes for "Company information" and "Learning materials".
- Left Sidebar:** Contains a "Northern Light" logo, a "Home" button, and three buttons: "Help Center", "Accounts", and "Company".

Northern Light 率先在搜索引擎后端用分类法 taxonomy 帮助自动将资料分入多方位的类目的 'folders'.

<http://www.icadl2015.org/KEYNOTES/talk3.pptx>

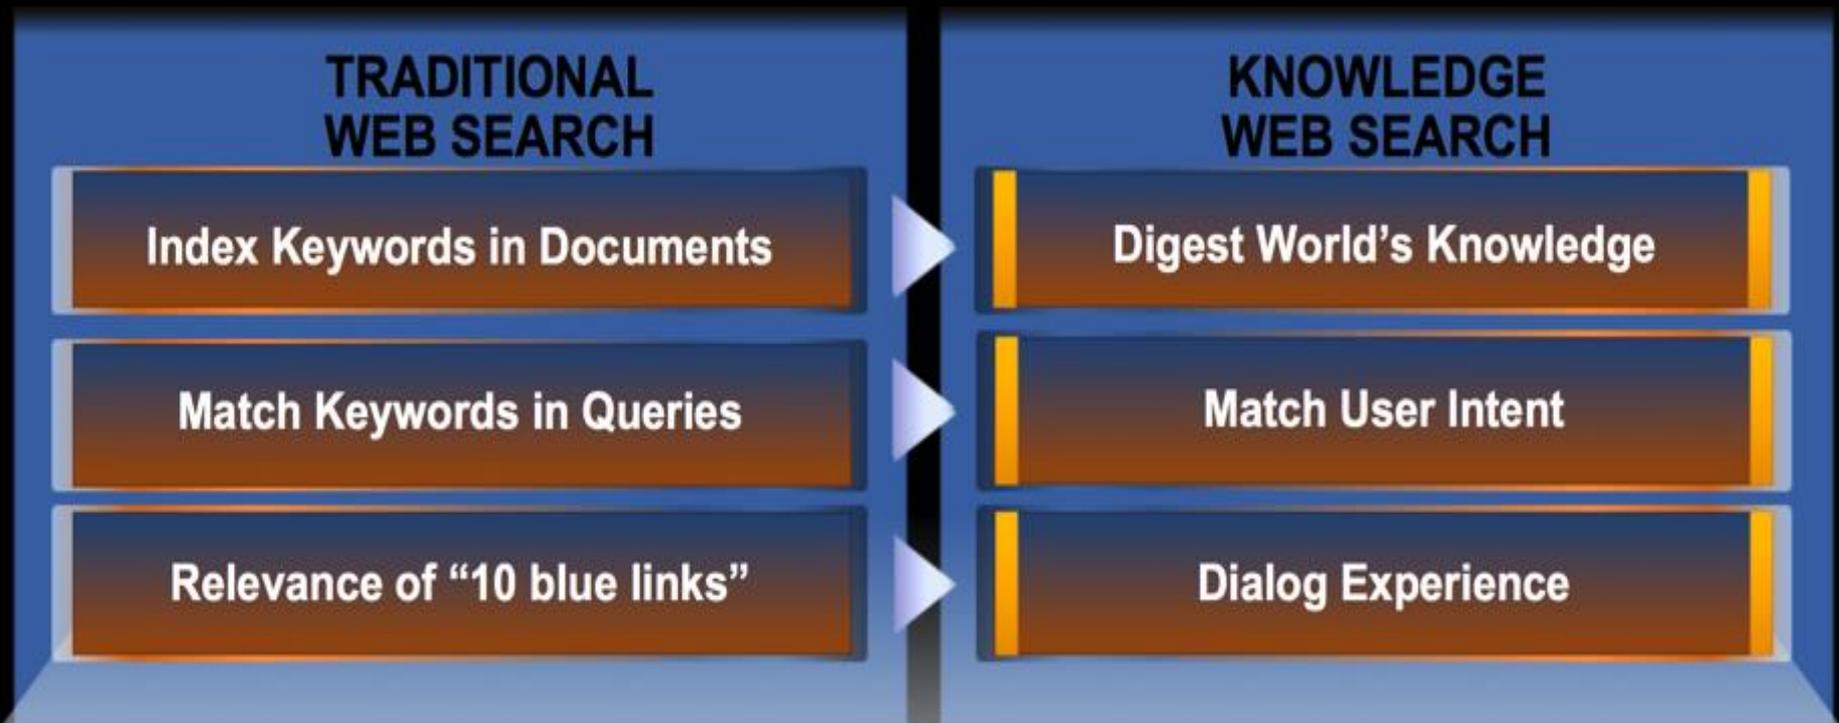

Semantic Web

- Human readable vs machine readable contents
- Human defines standard for data formats and models
- Explicit and *precise* specification of knowledge representation that everyone has to agree upon

Knowledge Web

- Machine reads human readable contents
- Machine learns to conflate different formats of the same thing
- Latent and *fuzzy* representation of knowledge learned by mining big data

Paradigm Shift in Web Search (the “Librarian”)

Progressive Suggestion

Bayesian network

A **Bayesian network**, **Bayes network**, **belief network**, **Bayes(ian) model** or **probabilistic directed acyclic graphical model** is a probabilistic graphical model (a type of statistical model) that represents a set of random variables and their conditional dependencies via a directed acyclic graph (DAG).

细看

KOS在语义网中的历程

—以Getty词汇为特例

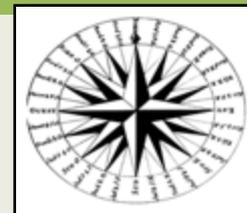

Art & Architecture
Thesaurus (AAT)

Union List of
Artist Names
(ULAN)

Getty Thesaurus of
Geographic Names (TGN)

Cultural Objects Name
Authority (CONA)

1. 发展历程简介

《艺术与建筑索引典》 Art & Architecture Thesaurus (AAT)

- ☑ 1970s 起步
- ☑ 1983 移至Getty
- ☑ 1990, 1994 出版
(书本、电子式)
- ☑ 2005-2008 AAT-Taiwan 计划开始

- ☑ 2011-07开始
试验SKOS化

- ☑ 2013 转成本体
- ☑ 2014-02发布为
LOD

受控词汇(Controlled Vocabulary)

SKOS化，“值词汇”(value vocabulary)

本体支持的知识库 (knowledge base)

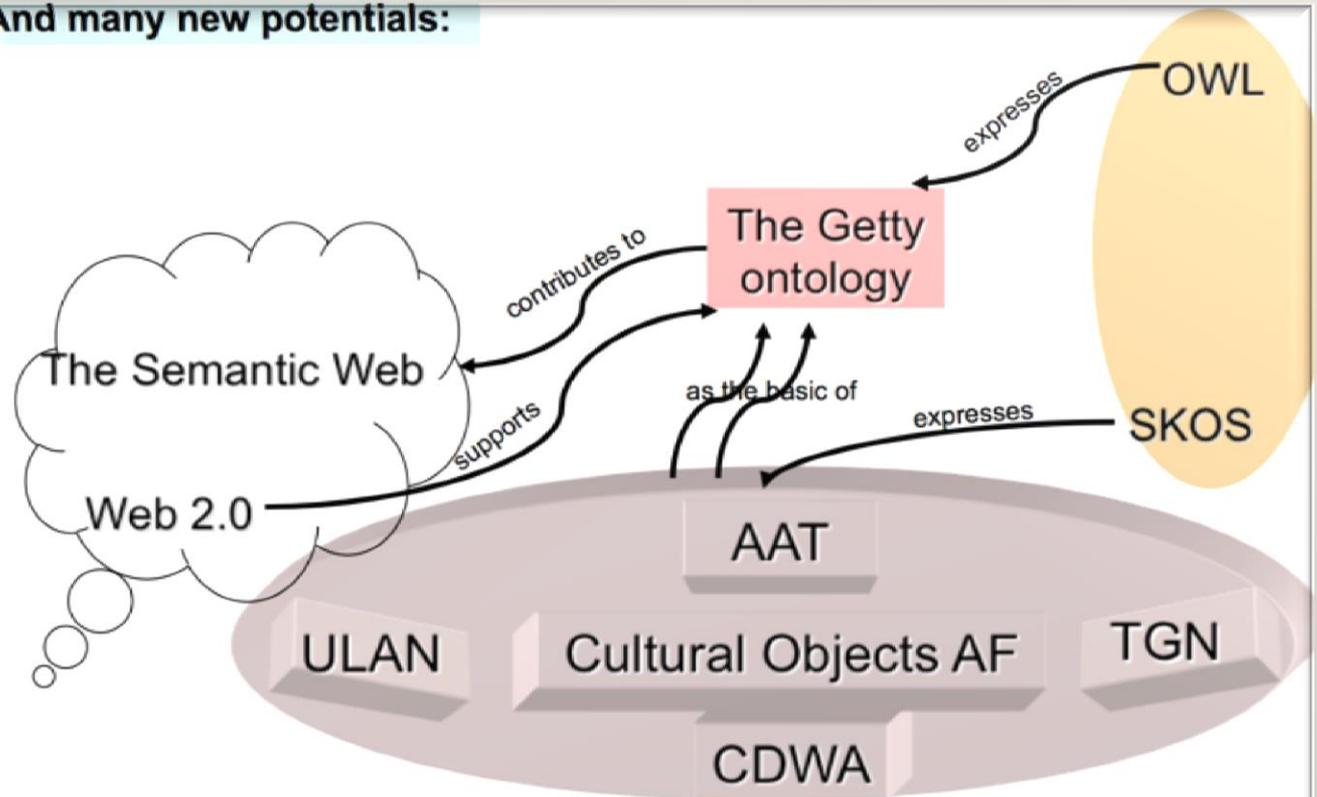

AAT 2016-05-09 统计数据: concept: 44795; term: 356569

2008: 对未来潜力的憧憬

- 认识语义技术新标准:
 - OWL本体语言
 - SKOS 知识组织系统的RDF化

And many new potentials:

SKOSifying a multilingual thesaurus

Questions you may have: 迈出第一步之前的困惑

- WHY do WE have to publish our data as "Linked Data"?
 - We have released e-versions: Web services, xml...
 - Why Getty has to do the job? Can we just let others who already SKOSified AAT do it?
 - Where this will put Getty vocabularies into the communities or big pictures?
- HOW can we make sure not to lose our rich contents in the 'triples' or 'graphs'?
 - How to update of the vocabulary when it is released to the cloud? (Time stamp, validity, synchronizing issues)
 - How about licensing?
 - (Well, Linked Data does not equal to Open Data. See also: [CC](#) | [CKAN](#))
 - Will people use our data incorrectly or inappropriately?
 - Other issues, e.g., traffic

虽然任务是与SKOS的 mapping, 本试验实际上是用Protégé做的, 产生一个带instance的本体样本。

- 从XML转为RDF TTL
- 从Getty内部模型转为SKOS
- 提出三种带有不同语义强度的模型

第二步：从SKOS化的“值词汇”彻底转向本体

在试验中遇到若干问题

- How to represent lookup lists, associative relationships, N-ary relations, revision
- Tool limitations – no functionality for language attributes from a database
- Use RDBMS or triple store?
- Environment limitations – RDF uses more space on filesystems
- Need for a semantic/ontology expert to connect data to established standards
- What to do with lookup lists

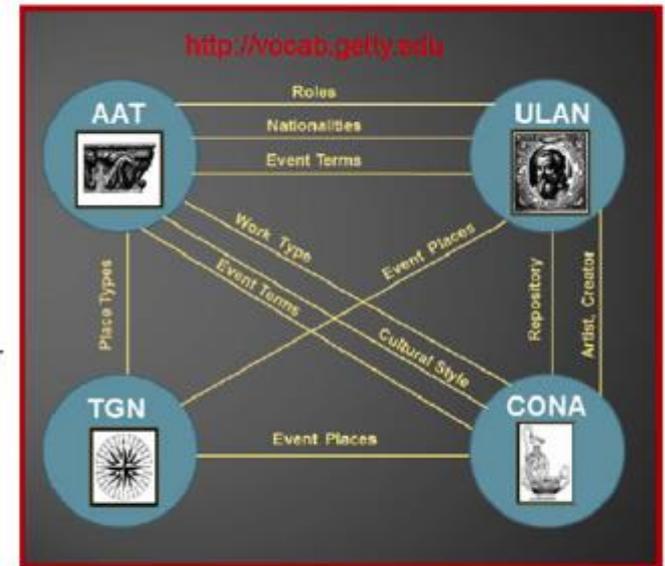

2013 Ontotext Corp 的 Vladimir Alexiev 加入，负责建造本体

更重要的：

认识到关联数据的巨大潜力

Opportunities for Connecting Data

- Language list made into its own hierarchy in AAT
- Languages coordinated with IANA Subtag Registry
- TGN place types connected to AAT subjects
- ULAN roles connected to AAT subjects
- ULAN nationalities connected to AAT subjects
- ULAN events connected to AAT subjects
- ULAN places connected to TGN subjects

2.2 Descendants of a Given Parent
Let's look for AAT descendants of 300194567 "drinking vessels". This finds "rhyta" and other interesting records, including "Fichtelgebirgehumpen":

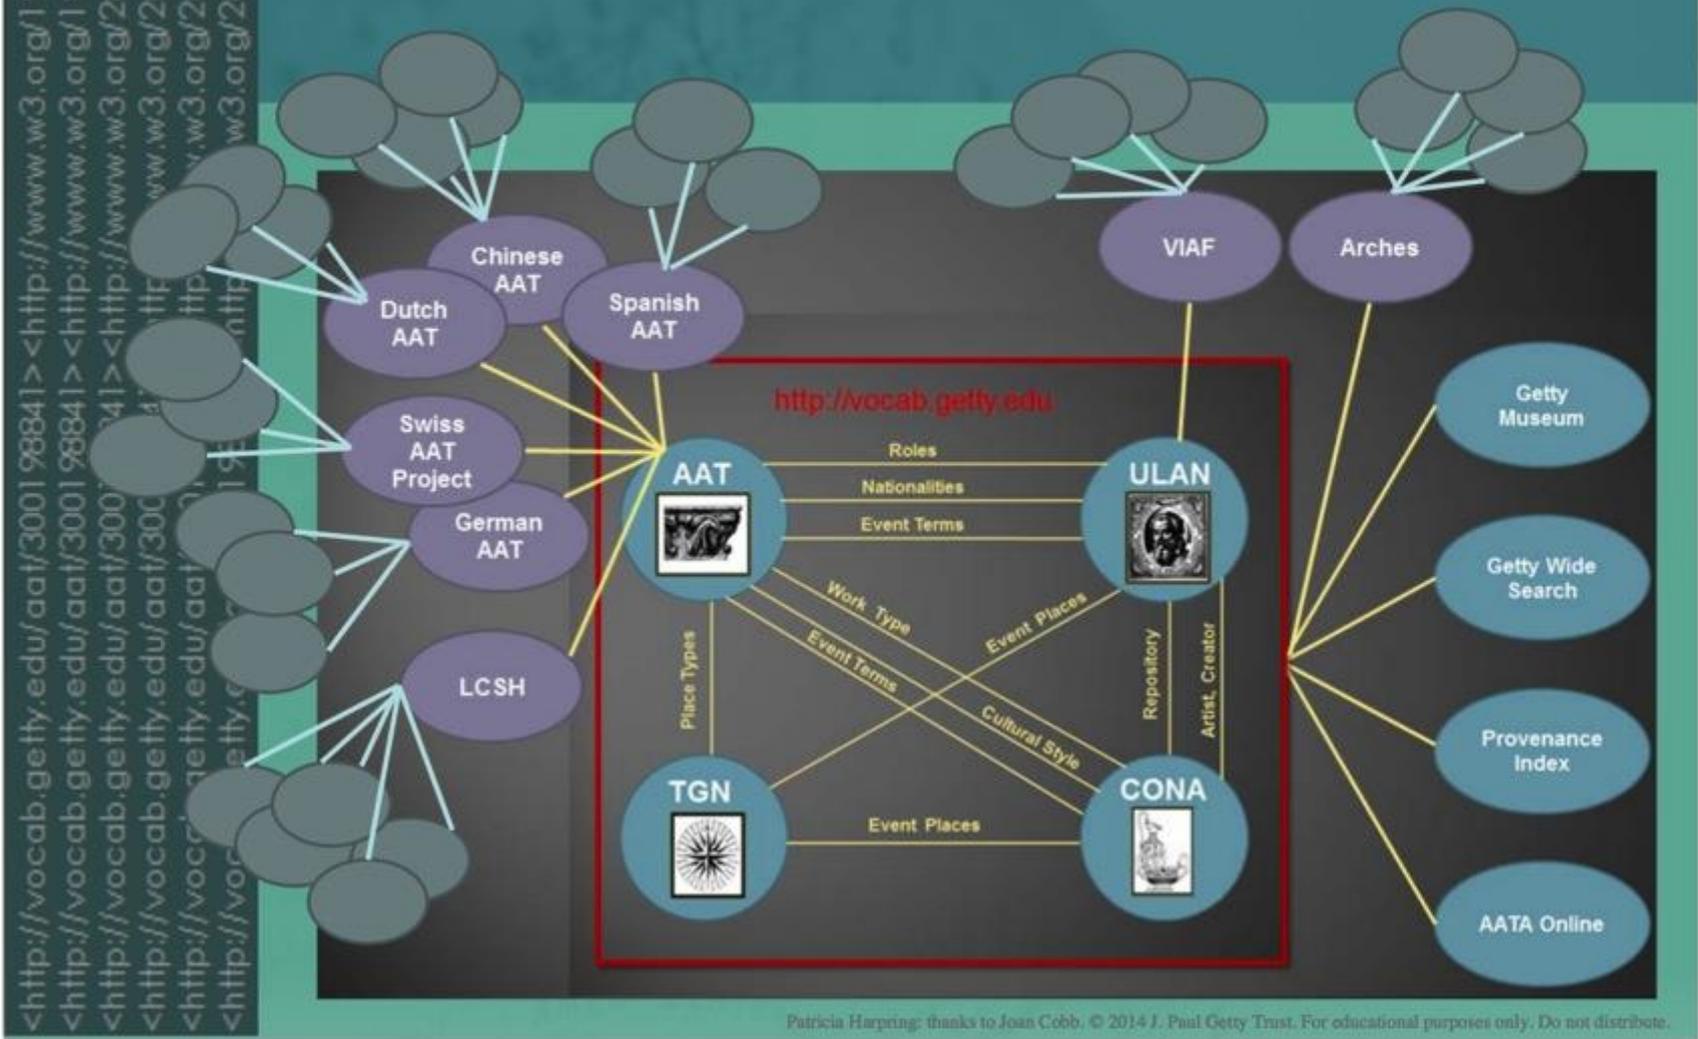

2.3 Subjects by Contributor Id
You can easily find subjects contributed by a particular Contributor if you know the id. E.g. the Getty Conservation Institute (GCI) in AAT is aat_contrib:10000088. Let's find their contributions to aat:300033618 paintings (visual works):

How ?

- 1st step: In SPARQLEndpoint at vocab.getty.edu, use a query like this [example](#) and download json.
- 2nd step: insert the json file in OpenRefine and extract data (nationality, date, etc.) using split function and regex if needed.
- 3rd step: Export csv data with comma-separated value and use [table2net](#) to create a .gexf file (use bipartite Network).
- 4nd step: Open .gexf file in [Gephi](#) and play with classemment and partition to adjust edges before using Force atlas 2 as spatialisation.
- 5nd step: in the preview, change the settings as you like
- 6nd step: After downloading the plugin sigma.js, export your project and put it on a local server to try.

This example is based on requests by Vladimir Alexiev, available on the Getty's website. Thanks.

@mzeng

结语：1. 当今KOS的基本方式都可以追溯到古代对知识的组织方式和逻辑思维，甚至连计算机de各种可视化表现也缘于先人的智慧。

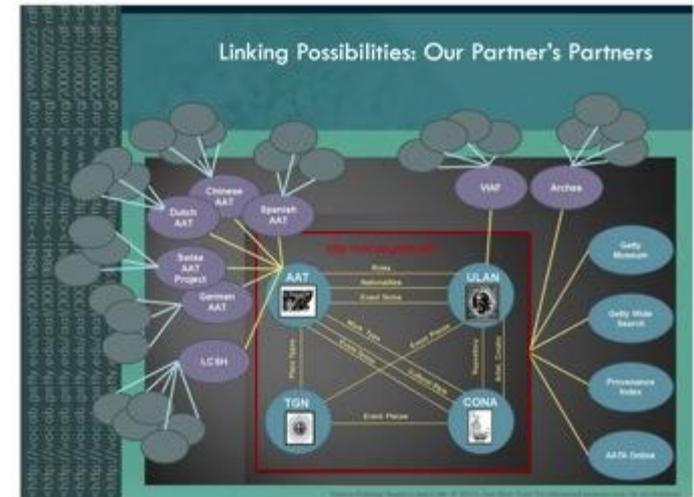

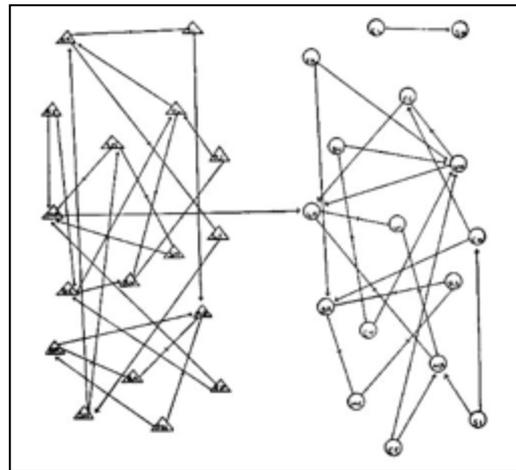

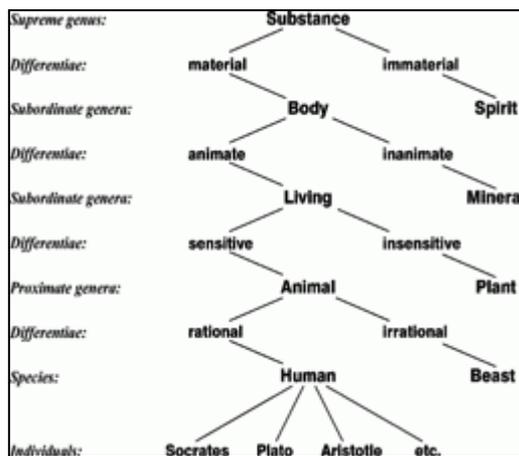

二十四氣晝夜長短百刻之圖

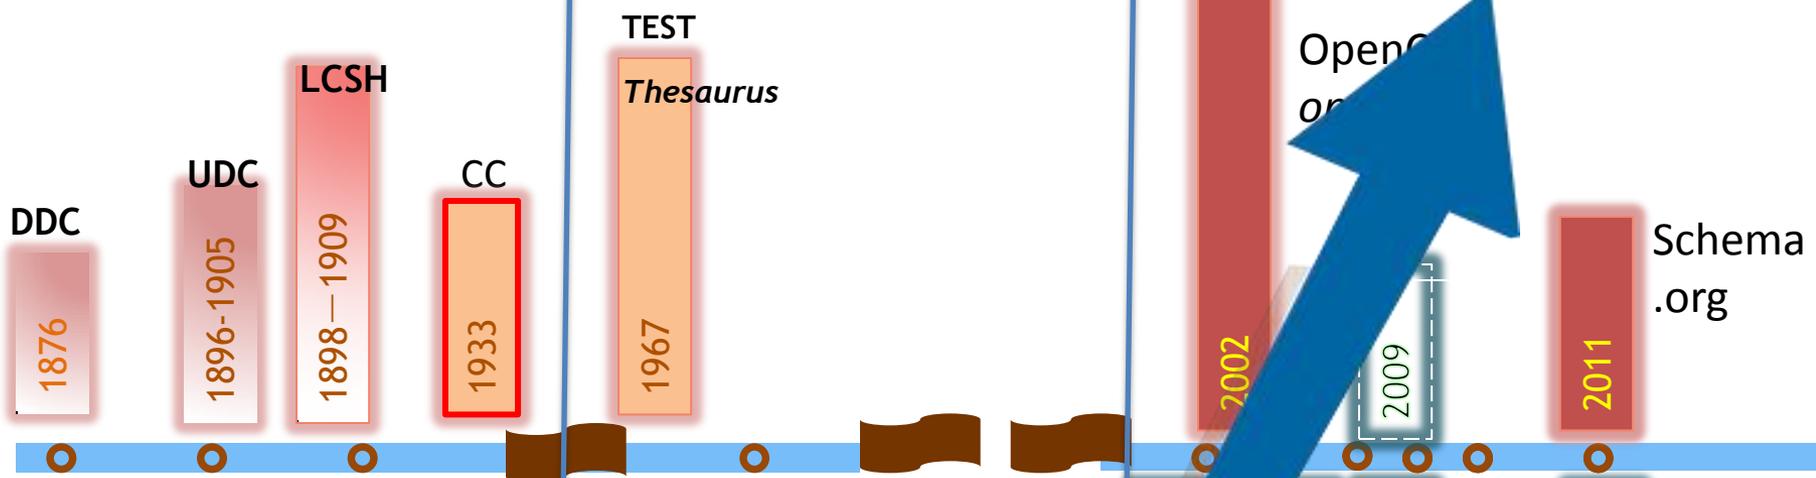

结语： 2. KOS及应用的主流动向

- 从树(tree)到网(network)
- 从规范控制(authority control)到概念模型建设(conceptual modeling)
- 从词汇(vocabularies)到知识库(knowledge base)
- 从格式上的转换到功能上的突破

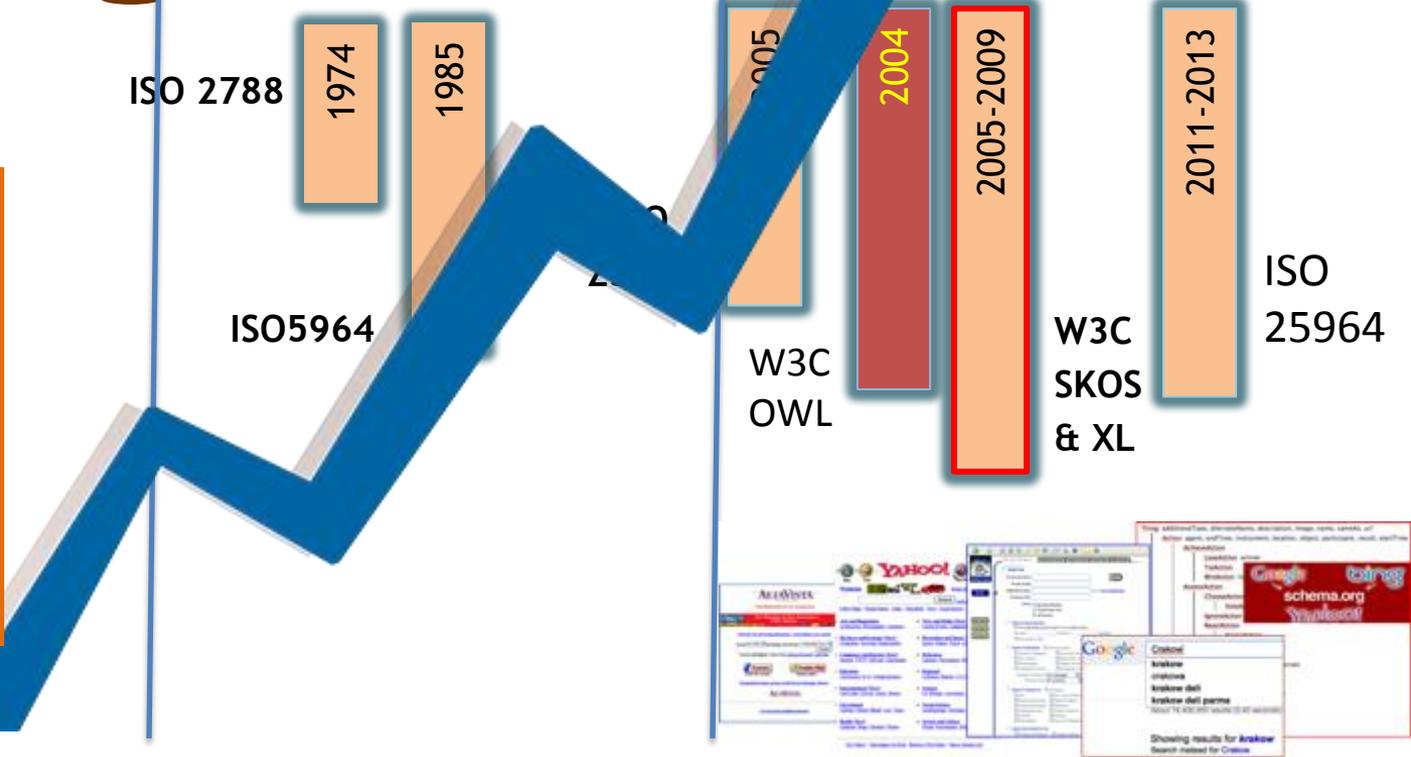

结语：3. KOS应时代需求而发展；当今正处于一个范式转变的阶段

Systems

Standards

我们必须跳出传统的定界，意识到KOS的潜力，探索其功能的突破。

謝謝！
